

Preliminary Call for Papers

32nd International Conference on Information Systems Architecture and Technology

Special session on SOA

18-20 September 2011, Szklarska Poręba (Poland)

This year the 32nd edition of **International Conference on Information Systems Architecture and Technology (ISAT)** will be held in Szklarska Poręba, Poland in September 2011. The organizers for the **first time** propose a **special session on Service Oriented Architecture (SOA) systems** aimed to **PhD students** and **young scientists**. The goal of the special session is to provide a **forum** to present and discuss experiences, ideas, innovations, as well as concerns related to the SOA systems. Moreover, the organizers expect that the special session will be a trigger for the further research and **co-operation** in the field of SOA systems.

Potential authors of research papers are invited to submit their manuscripts reporting original work in any of topics listed below. To ensure high quality of the special session, all papers will be **reviewed**. Accepted papers are planned to be published in a **book** (with the International Standard Book Number - ISBN) by *Oficyna Wydawnicza Politechniki Wrocławskiej*, and the best papers will be invited to be published in the **Systems Science journal**. Submitted papers should be prepared according to the template available at the conference home page and are supposed not to exceed **12 pages** (additional pages will be charged extra). All accepted papers must be presented by one of the authors.

Important dates:

Submission of full papers:
10.07.2011

Announcement of papers acceptance:
31.07.2011

Submission of camera ready papers:
7.08.2011

Submission of conference fee:
7.08.2011

Topics:

- Service Oriented Systems Modeling and Design
- Business Processes in SOA systems
- Quality-driven SOA systems
- Knowledge Management in SOA systems
- Service Composition and Design
- Resource Management in SOA systems
- Security Aspects in SOA systems
- Applications of Social Networks in SOA systems
